

NHSN Analysis FAQs: How do I create a line list of procedures?

1. Navigate to the Advanced > Procedure-level output options folder and click the Modify button next to “Line Listing – All Procedures”.

2. Make any desired modifications to time period and/or other criteria (e.g., limit to specific procedures).

Select a time period or Leave Blank for Cumulative Time Period:

Date Variable	Beginning	Ending	
procDateYQ	2011Q1	2011Q2	Clear Time Period

☐ Enter Date variable/Time period at the time you click the Run button

Specify Other Selection Criteria:

[Show Criteria](#) [Column +](#) [Row +](#) [Clear Criteria](#)

procCode			
IN (HPRO, KPRO)			

3. Scroll down to the “Other Options” section and use the options to select variables for your line list, sort your line list, and determine a page-by variable. TIP: the Page By variable will provide you with one list per value. For example, if surgeonCode is selected, you will obtain one line list per surgeon.
4. Make any additional modifications to your report and click the Run button. Your output will appear with all appropriate modifications.

National Healthcare Safety Network Line Listing for All Procedures

As of: September 19, 2011 at 2:54 PM

Date Range: PROCEDURES procDateYQ 2011Q1 to 2011Q2

Surgeon Code=2142

Patient ID	Date of Birth	Gender	Procedure ID	Procedure Date	Procedure Code	Risk using All SSI Model	Surgeon Code
COVMAR11	04/13/1950	M	5205507	03/11/2011	KPRO	0.0066	2142
